

School Map

Only a daredevil would venture into the unknown without a good map!

The School Map project is implemented using an extensive questionnaire-based survey which is focused on mapping the school climate, i.e. mutual relationships and individual attitudes and opinions of students, parents and teachers.

Most questions are multiple-choice, i.e. the respondents select from a list of answers. The questionnaires are filled out anonymously.

School Map – Content

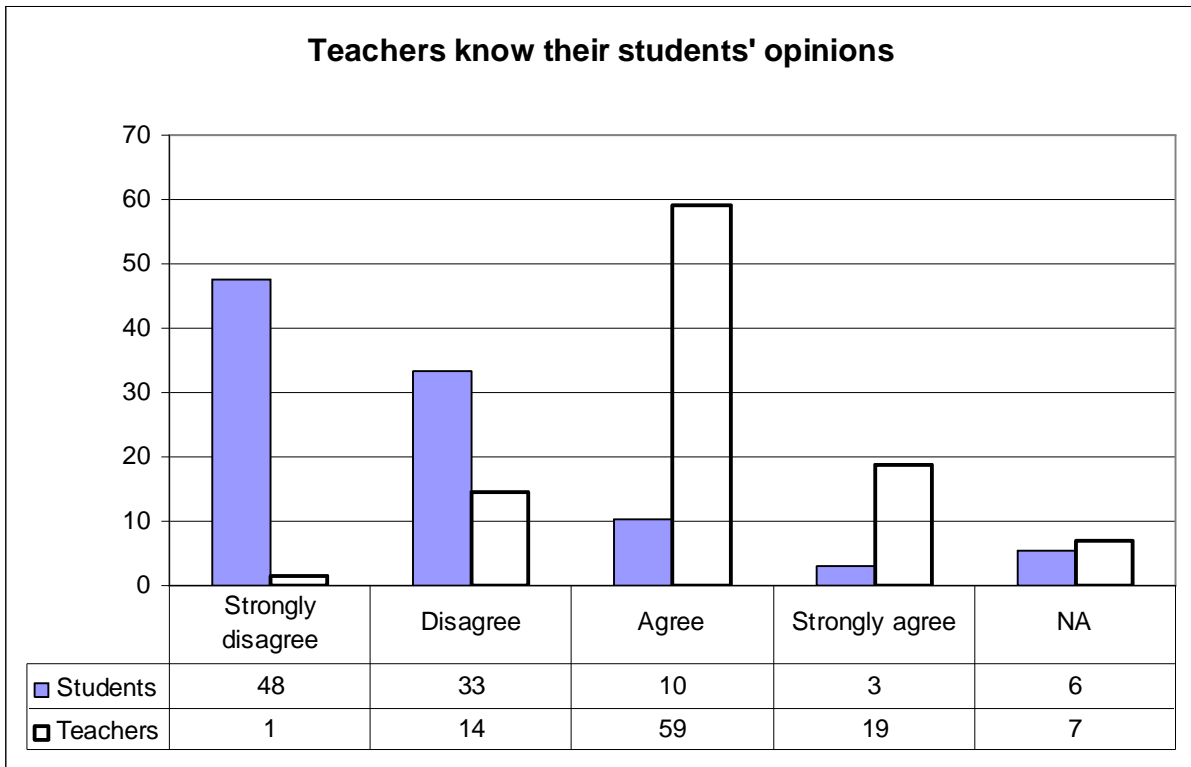

Examined areas include:

- school goals
- why parents choose our school
- satisfaction with the school
- quality and form of courses
- evaluation
- relationships
- safety and health in the school environment
- cooperation
- school facilities and equipment
- superior aspects of the school

School Map – Results

The final report contains a

- **Summary Section** in which the results of all schools will be evaluated, incl. annotated examples of results
- **Analytical Section** which is specific for each participating school.
